Work Experience

ABC Company

Analyst Programmer / Specialist   **Apr / 2017 - Nov / 2023**

- For this position, I mainly develop system as C#, MVC, PHP, MYSQL and MS SQL. Some project will use ASP.net. I should know HTML, CSS and Javascript for all projects.

- For most project, I have to help Project Management to analyze client's requirements. I will analyze client's doc, contract, service spec. If find some points have to be clarify by client, I need to join the meeting/con-call with client. Sometimes, I have to analyze client' old system. When html developer completed the html development, I will check if the html match client's requirements and can be implemented to CMS.

- I have to provide technical opinion to Project Management.
- For some project, I have to co-operate with other team/party to design the system and find out risk. One good experience is that we co-operate with client's other venders to implement Single Sign-On(SSO) for different website/Apps.
- I have to design data table structure of the Database for project.
- I have to build up website(front-end/back-end) as different code language, e.g. C#, PHP, JQuery.
- Some project , I have to use client's API to implement the system, include payment gateway API, REST API. Sometimes, I have to deploy web service for client.
- For some project, I will be a small team leader. I have arrange the timeline with Project Management. I should arrange task for other teammate.

Over And Over CONSOLIDATION SERVISE LTD
IT PROGRAMER   **Jul / 2012 - Mar / 2017**

- For this position, I mainly use C#, Classic ASP, VB.NET, VB6, MYSQL, MSSQL, PL/SQL and Crystal Report.

- Being a in-home programer, I have to maintain the company web operation system, include bug fixing, updating system logic flow.

- To keep the system up-to-day, I have to add new functions in old system, build up new system. I have help to build up 2 new operation system for export shipping and import shipping.
- Being the main IT team of the company, I service the whole company group with different branches. I have to help different branched to build up system or update their system. One good experience is that I helped Bangkok new office to build up company network and operation by myself.
- The system have to connect to Automated Manifest System(AMS) and shipment company. Therefore, I have to develop EDI system to process data exchange. I have to read the EDI API documents, analyze if system full-fill EDI system request, update system to full-fill EDI system request if necessary and implement the EDI API.
- I have to build up other system for other purpose, eg. Trucking System, Time-Attendance System.
- For internal report functions, I have to use VB.NET, VB6 and Crystal Report to create reports and billings.
- Our team have to provide technical support.
